TECHNICAL SKILLS

Languages

TypeScript, JavaScript, Python, Go

Backend

NestJS, Express, Django, FastAPI, hexagonal arch., microservices

Frontend

React, Next.js, Astro, Tailwind CSS

Data

PostgreSQL, MongoDB, Prisma, RabbitMQ, pg-boss

Infra / Cloud

Docker, Kubernetes, CI/CD, Vercel, Render, AWS S3

EDUCATION

B.Sc. in Computer Science

UNLP — in progress (2018–pres.)
18 / 37 courses completed

IT Analyst (intermediate degree)

UNLP
17 / 24 courses completed

LANGUAGES

Spanish — native
English — intermediate

PROFILE

Software developer with production experience, building end-to-end solutions: APIs, microservices, async messaging, databases, and deployment. Recent focus on hexagonal architecture and modular monoliths for both personal and client products.

WORK EXPERIENCE

Freelance Developer • CEPA Argentina

2025 — PRESENT

- Institutional site for an NGO, working alongside a UX/UI designer; content management via CMS.
- Ongoing feature work (CMS, accessibility, SEO, animations) through `feature/*` branches with PR review.

Astro 5

React 18

Tailwind + HeroUI

Decap CMS

TypeScript

Vercel

Freelance Developer • Online course platform (Dr. M. Perrupato)

2026

- Two deliverables built with a team of 2: an institutional landing page and a training platform with courses, assessments, certification and payments.
- Modular monolith with strict hexagonal boundaries between domains; authoritative payment confirmation on the backend; video protection.
- Live in production since August 2026, with certificate issuance confirmed by the client.

NestJS

Next.js

Prisma

pg-boss

Mux

Mercado Pago / PayPal

PostgreSQL

Junior Full-Stack Developer • Autoinspector

NOV. 2021 — NOV. 2022

- Platform for insurers built on a microservices architecture (~10 services) with async communication.
- Internal admin panel, accounts service, inspections core and WhatsApp bot flow, billing service (Go), and notifications.

NestJS

Next.js

Go

MongoDB

RabbitMQ

Docker

Kubernetes

FEATURED PROJECTS

Necto — Neighborhood trades marketplace

COMPLETED

Solo-built MVP, end to end: modular monolith with hexagonal architecture, distance-based search ranking (haversine in Postgres), passwordless auth, and identity verification.

Next.js 16

PostgreSQL + Prisma

Auth.js

Mapbox

My Portfolio — Interactive 3D portfolio

ACTIVE

Personal portfolio navigable in 3D: an archipelago where each island represents a section, with isometric camera and procedural terrain.

React Three Fiber

Three.js

Zustand

Estudio Nodo — Own web development studio

LANDING LIVE

Own custom web development brand, built on top of already-delivered projects (CEPA Argentina, Academy). Fixed-price model with a recurring monthly maintenance plan.

Vite

Vanilla JavaScript

SEO / JSON-LD
